Riddle Answers

You are in a house with 4 windows, which all face South, a bear walks by. What color is the Bear?

White, if all the window face south, you must be on the north pole. The bear must be a polar bear.

2. What can run, but can't walk?

Water

3. If you're 8 feet away from a door and with each move you advance half the distance to the door. How many moves will it take to reach the door.

You will never reach the door! If you only move half the distance, then you will always have half the distance remaining no matter how small the number.

4. What belongs to you, but is used more by others?

Your name.

5. While exploring the wild highlands of Scotland, Crazy Rob was captured by hostile wood fairies. Smazze, the powerful chief of the fairies told him he could make one final statement which would determine how he would die. If the statement he made was false, he would be boiled in water. If the statement were true, he would be fried in oil. Crazy Rob found neither of this options to his liking, so he made a statement that got him out of this seemingly impossible situation. What is the one statement he could make to save himself?

Crazy Rob said: "You will boil me in water." The fairies were faced with a dilemma. If they boil him in water, that would make his statement true, which means he should have been fried in oil. They can only fry him in oil if he makes a true statement, but if they do, it would make his final statement false. The fairies had no way out of their situation so they were forced to set Crazy Rob free.
